You can enable this option in your account settings New daily login rewards Fixed issue involving allocation of team event rewards Localization improvements Stability improvements and crash fixes Various bug fixes Hill Climb Racing 2 Review In all reality we love this game. But mainly it has flaws being the fact that the game makes you connect to game center or google play games and you can with parental controls. Plus it mainly makes you lose progress if you are switching devices. We love this game! We've been playing this game over six years, and its still just as fun! Get on a team and GO!!!! This game is so fun! We honestly think instead of 3 parts you should have 4 It would be just more fun cuz think of it if you use the jump shocks fuel boost gliding wing things and the landing boost Imagine how fun that would be. [Not saying the game is bad or anything. This is a great Game finger soft can you make more Games. Played this game off and on for years, they make updates and guild playing is really fun. Lots of vehicles and great gameplay. Been leader of the guild 2022 Active for almost 2 years now! Come race with us. Is good is great its almost perfect. FUN TIME-CONSUMING ADVENTURESS. This game is literally a masterpiece. Developers if your listing please add a Arabic guy named habebe that has a child for an item and an emote that makes your character dance with bees by the way great game sirsirly all of the chicken nugget clan. We love this game. The fact that we get to play with our family in friends in co workers but (we) notice we dont know when were online?? Or is there some place Im not looking???? The game is great and we think that with the addition of the CC-EV the game just gets a lot better their still adding new cars and maps to the game adding the challenge to get as far as you can with every car or truck and friends are easier to add now so you can get them really quick so we think the games great. This is a good game and very Vip. We love this game but its getting old for us because we got to diamond and we cant seem to progress without getting a major setback for when you lose a race. Its a pretty good upgrade from hcr1 we love the aspect of teams and everything new except the fact that its way harder to upgrade vehicles. The game is fun they just need to make the setbacks better like making only set you back a very tiny bit or they could just make it so you get no point when you lose a race. Can you make it so the camera stays focused on our vehicle and not the other players. Sometimes we lose which vehicle is ours since the camera follows everyone not just our car. Thank you. We love this game really fun and if your internet connection is down you can do adventure mode and get coin! We love how they keep adding new stuff over the years looking forward to it! So you trying to get a car and you almost get it but you ardently press the upgrade box and you wast 10s of thousand coins and it takes forever to get your coins back. We enjoy the HC2 game. Its our go to for relaxing downtime. We have played the game a long time now, several years. Our biggest complaint is that it crashes a lot, and mean it crashes a lot, probably because we blocked the third-party trackers, (setup to block by our router, and block on our devices) and there are a lot of third-party trackers with this app!!!!, as there are a lot of behind the scene trackers on a lot of gaming app. There is no real reason to have dozens of trackers on gaming apps, period!! Fun game but the number of advertisements makes the game almost unplayable. It also takes too long to earn enough coins for upgrades! Especially if you try to avoid the insane amount of ads!! We've played this game for two years now and spent a lot on it, here recently its gotten to were we have to start the game multiple times before it loads, it wont count our times on anything unless we reload it a bunch of times, if we score 30k+ on an event it wont take it, if we beat a friends challenge it wont take it, but if we fail it takes it. If we try to post a km challenge by the time we make 1k km its saying offline, and thats with us sitting right next to our router using only WiFi. And we know its the game because none of our other apps or games act this way. Im to the point Im done playing because we cant play, its annoying waiting to build up 4 tickets and wasting all of them but one to get a decent time because it wont accept anything we do and we have to rush before it goes offline. We refuse to spend anymore money on this game or give a 5 star review until whatever this issue is is fixed. We never will recommend this game to anybody. We play and we only go against players 50x better than us. We only get parts for the mono wheel. Do NOT download this dumb game. Buys \$13 in app purchase is charged an extra \$20, bringing the total to \$33 Cool game but has lots of bugs. We've had multiple occasions where we just didnt get our season reward. When we asked support for help, they said there was nothing they could do. We've responded to them to keep our ticket open but they have not replied. Dont waste your time with this game. Nothing but ads and nonsense, fun for about ten minutes. Just what it says , new update would not recognize that iPad was online and all previous saved cars and upgrades gone and Im supposed to locate old emails to forward to consumer help to verify not happy and am not sitting through all those videos again to get upgrades or spend money. Re downloaded and nothing. Immediately uninstalled it after we got an ad that played sound automatically even though our phone was set to silent. About the game- although good, we remember the first one being less of a cash grab than this one. Id honestly just rather play that. If you join a team you get so much money. This game is so fun us and our dad play it now its free. This game is just like the other one but better. Mainly cuz you can actually race other players. But we do wish you could get money easier cuz we struggle to get upgrades and everybody beats us. But other than that we would suggest the game. The game is exciting and enjoyable. Its a good game but there is not enough boss battles. Hill climb racing is a fun racing game. We love all the cars and how fast the rally car is. The maps are enjoyable, we sometimes go toooooo fast and die, we love it all except for the all of the sudden the gas pedal just doesnt seem to work and we have died from it a lot of times and Im annoyed and frustrated that it keeps happening so please fix the gas pedal from all stopping but the rest of the game itself is great, fun, awesome, amazing, and soooooo addicting and we cant stop playing it! In this game when you go to adventure mod when it say two times the coins it not real we tried it 10 different times and it will never workThat is all we have to say thank you This message is from Brantley Cody.
